GP-20D (3:1 Ratio)

Features

- ▶ Single piston air powered drum pump
- ▶ New 3:1 ratio air motor for higher viscosity fluids
- ▶ Quick air motor changeover with exclusive IPM design
- ▶ Extremely robust pump packings
- ▶ Uniquely designed piston seals restrict corrosive material from remaining on the shaft. This feature is especially helpful with Isocyanates which tend to crystallize on the shaft after exposure to air.
- ▶ Standard 55 gallon drum design

Model Number

- ▶ Part Number: 830303 (Stainless Steel)

Technical Information

Description: GP-20D

Pressure Ratio: 3:1

Maximum output: 5.5 GPM (20 LPM)

Pump stroke: 4 inches (101mm)

Air inlet pressure range: 30~180 PSI (2~12bar)

Maximum fluid output pressure: 540 PSI (36bar)

Air inlet size: 3/8" NPT(F)

Fluid outlet port size: 3/4" NPT(F)

Typical Fluids Handled

- ▶ Solvent based paints
- ▶ Water based paints (SST model)
- ▶ Various solvents
- ▶ Chemical based cleaning supplies
- ▶ Chemicals
- ▶ Catalysts
- ▶ Isocyanates
- ▶ Adhesives
- ▶ Resins
- ▶ Polyurethanes
- ▶ Polyureas

Typical Applications

- ▶ Foam/polyurea coating chemical supply
- ▶ Spray gun supply
- ▶ Dispensing valve supply
- ▶ Fluid transfer
- ▶ Motor oil transfer
- ▶ Urethanes for wood products
- ▶ Coatings for fabricated metal components
- ▶ Varnishes
- ▶ Lacquers
- ▶ Lubricants
- ▶ Mold Release Agents
